

Test Case ID	Component	Description	Setup	Steps	Expected Outcome	Technique Applied
TC_01	User Registration / Sign-Up	Verify the system blocks account creation and displays a mandatory field validation error when the email input is left completely blank.	1. User is on the registration/sign-up page. 2. User is not currently logged into any account.	1. Leave the "Email" input field completely empty. 2. Fill in all other required fields with valid data. 3. Click the "Register" or "Sign Up" button.	1. Account registration is blocked. 2. The page does not reload or clear other valid fields. 3. A visible, user-friendly error message is displayed near the email field stating "Email is required" or "This field cannot be blank."	Missing Mandatory Field
TC_02	User Registration / Sign-Up	Verify the system creates an account and displays a successful account creation message.	1. User is on the registration/sign-up page. 2. User is not currently logged into any account.	1. Fill in all required fields with valid data. 2. Click the "Register" or "Sign Up" button.	1. Account is created. 2. A visible, user-friendly message is displayed stating the successful creation of the account.	Equivalence Partitioning (EP)
TC_03	User Registration / Sign-Up	Verify the system blocks account creation and displays a mandatory field validation error when the name input is left completely blank.	1. User is on the registration/sign-up page. 2. User is not currently logged into any account.	1. Leave the "Name" input field completely empty. 2. Fill in all other required fields with valid data. 3. Click the "Register" or "Sign Up" button.	1. Account registration is blocked. 2. The page does not reload or clear other valid fields. 3. A visible, user-friendly error message is displayed near the name field stating "Name is required" or "This field cannot be blank."	Missing Mandatory Field
TC_04	Login	Verify the system logs in the user when the proper email and password are entered.	1. User has a valid account. 2. User is on the log in page. 3. User is not currently logged into any account.	1. Fill in required fields with valid inputs. 2. Click the "Login" button.	1. User is logged into account. 2. A visible user-friendly message is displayed stating successful login.	Equivalence Partitioning (EP)
TC_05	Login	Verify the system blocks account log in displays mandatory field validation error when the email input is left blank.	1. User has a valid account. 2. User is on the log in page. 3. User is not currently logged into any account.	1. Leave the "Email" input blank. 2. Fill in all other required fields with valid inputs. 3. Click the "Login" button.	1. User is not logged into account. 2. A visible user-friendly message is displayed stating "Email is required" or "This field cannot be blank".	Missing Mandatory Field
TC_06	Login	Verify the system blocks account log in displays mandatory field validation error when the password input is left blank.	1. User has a valid account. 2. User is on the log in page. 3. User is not currently logged into any account.	1. Leave the "Password" input blank. 2. Fill in all other required fields with valid inputs. 3. Click the "Login" button.	1. User is not logged into account. 2. A visible user-friendly message is displayed stating "Password is required" or "This field cannot be blank".	Missing Mandatory Field
TC_07	Login	Verify the system blocks account log in displays field validation error when the email input is incorrect.	1. User has a valid account. 2. User is on the log in page. 3. User is not currently logged into any account.	1. Fill in "Email" input with invalid input. 2. Fill in all other required fields with valid inputs. 3. Click the "Login" button.	1. User is not logged into account. 2. A visible user-friendly message is displayed stating "Email is incorrect".	Mandatory Field Validation
TC_08	Logout	Verify the system successfully logs user out of their account and displays a successful message.	1. User is logged in.	1. Click the "Log Out" button.	1. User is logged out of account. 2. A visible user-friendly message is displayed stating the user was successfully logged out.	Equivalence Partitioning (EP)
TC_09	Product Filter	Verify that selecting a category dynamically filters the products displayed.	1. User is on products page.	1. Click on "Men" category. 2. Click on "Jeans" sub-category.	1. Product display updates. 2. All displayed items match selected filters (Men's Jeans). 3. Page header matches selected filters.	Equivalence Partitioning (EP)
TC_10	Product Filter	Verify that selecting a multiple categories dynamically filters the products displayed.	1. User is on products page.	1. Click on "Men" category. 2. Click on "Jeans" sub-category. 3. Click on "Polo" brand.	1. Product display updates. 2. All displayed items match all selected filters (Men's Jeans by Polo). 3. Page header matches selected filters.	Equivalence Partitioning (EP)
TC_11	Product Filter	Verify that selecting a brand dynamically filters the products displayed.	1. User is on products page.	1. Click on "Polo" brand.	1. Product display updates. 2. All displayed items match selected brand and displayed product account (Polo (6)). 3. Page header matches selected filter.	Equivalence Partitioning (EP)
TC_12	Cart	Verify that item is added to cart and displays a successful message.	1. User is on a product details page.	1. Click "Add to cart".	1. Product should be added to cart. 2. A visible message is displayed indicating item has been added to cart.	Equivalence Partitioning (EP)
TC_13	Cart	See how system reacts to large quantity of product in cart.	1. User has at least one item in cart. 2. User is on "Cart" page.	1. Type 100 into item quantity input field.	1. Items should be added to cart or message should display stating "Not enough stock".	Boundary Testing
TC_14	Cart	Verify that system removes item when quantity is set to 0.	1. User has at least one item in cart. 2. User is on "Cart" page.	1. Type 0 into item quantity input field.	1. Items should be removed from "Cart". 2. A visible message is displayed stating "Item has been removed".	Boundary Testing
TC_15	Product Details	Verify system redirects to selected product's details page.	1. User is on "Products" page.	1. Click on "View Details" button.	1. User is redirected to correct details page for item.	Equivalence Partitioning (EP)
